3md&w227 GREAT IMPROVEMENT IN DENTIS-

The attention of the public is called to a great discovery in Dentistry.

The main difficulty in wearing artificial teeth is, they do not hold in their place firmly enough, and add to this the annoyance of food getting wider the plate while eating. I have discovered a method of so constructing the plate on which the teeth are set that they will not start or drop while eating or speaking, neither will any particles of food get under the plate, no matter what the condition of the mouth is, and true of any method hithertoused. or drop while eating or speaking, neither will any particles of food get under the plate, no matter what the condition of the mouth is, which is not true of any method hithertoused. I have secured Letters Patent for the United

States, England and France.

The improvement is not in material, but in the construction, whichs course the atmospheric
